

# SOUTH EAST FORAGE INNOVATION

## Maize Focus Group

Are you interested in growing Maize?  
Want to hear more about Best Management Practices for Maize?

The South East Forage Innovation Project is aiming to grow 25 tonnes of dry matter in a Maize crop in rotation with other crops of grasses, legumes and brassicas, to a total of 40 tonnes of dry matter per hectare per year.

A Maize Focus Group is to operate along side of the project to look at the management and operations of growing Maize.

The group will meet at critical times through out the year to discuss best management practices of growing Maize.

**All farmers** who want to know more about growing Maize are welcome to participate.

The first meeting will be in late August 2006.

To register your interest in the Maize Focus Group please fax or post your expression of interest to 8724 7174 or PO Box 622 Mount Gambier SA 5290 by 11/8/06

Name: \_\_\_\_\_

Phone: \_\_\_\_\_ Fax: \_\_\_\_\_

For more information phone Robby Zeissig on 0429 440 026

There will be a small cost dependant on the number of participants.
